Subject Index

AERODYNAMICS

The Aerodynamic Action of Triangular Horn-Balanced Control Surfaces on the Supersonic Delta Wing, Derek Naylor ... 574
An Analytic Form of the Principle of Maximum Power, Carlo Riparbelli* ... 307
Characteristics and Sound Speed in Nonisentropic Gas Flows With Nonequilibrium Thermodynamic States, E. L. Resler, Jr. ... 785
Collision of Plane Shock Waves With Wire Screens, W. J. Franks and J. Gordon Hall* ... 917
Comments on the Lagrangian Multiplier in Drag Minimization, Robert T. Stancil* ... 388
Effects of Compressibility at Low Reynolds Number, Sir Geoffrey Taylor and P. G. Saffman ... 553
Interaction of a Plane Shock and Oblique Plane Disturbances With Special Reference to Entropy Waves, Che-Tyan Chang ... 675
A Method for Examination of Store Separation From Aircraft Through Dynamic Model Testing at Full-Scale Mach Number, Seymour J. Deitchman ... 275
Note on "Dissociation Effects in Hypersonic Viscous Flows," Denis J. Zigrang* ... 916
Note on the Turbulent Shear Stress Near a Wall, H. G. Elrod, Jr.* ... 468
On the Exact Solution of Compressible Couette Flow with Mass Addition and Binary Diffusion, Nathan Ness* ... 626
On the Reiner-Taylor-Saffman Dilemma, M. Z. v. Krzywoblocki* ... 915
On Transition Experiments at Moderate Supersonic Speeds, Mark V. Morkovin ... 480
On the Velocity Profile for Turbulent Flow Near a Smooth Wall, John W. Miles* ... 704
Polytropic Exponents for Air at High Temperatures, J. G. Logan, Jr., and C. E. Treanor* ... 467
Recent Developments in the Method of the Rheoelectric Analogy Applied to Aerodynamics, Lucien C. Malavard ... 321
A Simple Relation Between the Shock and Expansion Pressure Coefficients for Two-Dimensional Hypersonic Flow, J. L. Raymond and E. P. Williams* ... 389
A Theoretical and Experimental Study of Airplane Dynamics in Large-Disturbance Maneuvers, Donald W. Rhoads and John M. Schuler ... 507
A Theoretical Investigation of Laminar Separation in Supersonic Flow, G. E. Gadd ... 759
A Useful Method for Integrating the Time-Dependent, Viscous Equations of Motion, L. Filler, H. F. Ludloff, and P. Treuenfels* ... 147

AERODYNAMICS—BODIES

The Aerodynamic Force Coefficients of Yawed Slender Configurations at High Mach Numbers, Leon Trilling and James W. Clark* ... 913
Approximate Trajectories of High-Drag Bodies, George S. Campbell* ... 147
The Axisymmetric Supersonic Flow Near the Nose of a Pointed Body of Revolution, Luigi G. Napolitano and Antonio Ferri ... 900
Correlation of Cone-Cylinder Normal Force and Pitching Moment Data by the Hypersonic Similarity Rule, William H. Dorrance and Robert G. Norell ... 371
The Drag Coefficient of Very High Velocity Spheres, A. J. Hodges ... 755
Flow in the Forward Stagnation Region of Blunt Bodies, Robert W. Truitt* ... 380
Flow Over Blunt-Nosed Bodies, Robert W. Truitt* ... 709
Free Molecular Flow Forces and Heat Transfer for an Infinite Circular Cylinder at Angle of Attack, L. Talbot* ... 458
Inviscid Hypersonic Flow Over Blunt-Nosed Slender Bodies, Lester Lees and Toshi Kubota ... 195
Inviscid Hypersonic Flow Past Blunt Bodies, S. H. Maslen and W. E. Moeckel ... 683
Laminar Boundary Layer on a Spinning Cone at Small Angles of Attack in a Supersonic Flow, R. Sedney ... 430
Newtonian Flow Theory for Slender Bodies, J. D. Cole ... 448
A Note on Cone Base Pressures in Hypersonic Flow, Richard D. Linnell* ... 390
A Note on the Sonic-Wedge Leading-Edge Approximation in Hypersonic Flow, M. H. Bertram and D. L. Baradell* ... 627
Note on Tip-Bluntness Effects in the Supersonic and Hypersonic Regimes, F. D. Bennett* ... 314
On the Flow Over a Finite Wedge in the Lower Transonic Region, Hideo Yoshihara ... 661
On Magnus Effects Caused by the Boundary-Layer Displacement Thickness on Bodies of Revolution at Small Angles of Attack, John C. Martin ... 421
On the Normal-Force Distribution of a Cone-Frustum Body at Supersonic Speeds, William Dru Murphree* ... 710
Optimum Nose Shapes for Missiles in the Superaerodynamic Region, W. J. Carter ... 527

Free Molecular Flow Forces and Heat Transfer for an Infinite Circular Cylinder at Angle of Attack, L. Talbot* ... 458
Inviscid Hypersonic Flow Over Blunt-Nosed Slender Bodies, Lester Lees and Toshi Kubota ... 195
Inviscid Hypersonic Flow Past Blunt Bodies, S. H. Maslen and W. E. Moeckel ... 683
Laminar Boundary Layer on a Spinning Cone at Small Angles of Attack in a Supersonic Flow, R. Sedney ... 430
Newtonian Flow Theory for Slender Bodies, J. D. Cole ... 448
A Note on Cone Base Pressures in Hypersonic Flow, Richard D. Linnell* ... 390
A Note on the Sonic-Wedge Leading-Edge Approximation in Hypersonic Flow, M. H. Bertram and D. L. Baradell* ... 627
Note on Tip-Bluntness Effects in the Supersonic and Hypersonic Regimes, F. D. Bennett* ... 314
On the Flow Over a Finite Wedge in the Lower Transonic Region, Hideo Yoshihara ... 661
On Magnus Effects Caused by the Boundary-Layer Displacement Thickness on Bodies of Revolution at Small Angles of Attack, John C. Martin ... 421
On the Normal-Force Distribution of a Cone-Frustum Body at Supersonic Speeds, William Dru Murphree* ... 710
Optimum Nose Shapes for Missiles in the Superaerodynamic Region, W. J. Carter ... 527

Remarks Concerning Transition Reynolds Numbers on Cones and Flat Plates, Neal Tetervin* 545
Shock-Wave Curvature for Hypersonic Axisymmetric Flow, R. Sedney* 630
Stagnation Point of a Blunt Body in Hypersonic Flow, Ting Yi Li and Richard E. Geiger 25
Three-Dimensional Vortex Pattern Behind a Circular Cylinder, Francis R. Hama* 156
Transonic Flow With a Detached Bow Wave Past a Wedge Between Two Parallel Plane Walls, Shigeki Morioka 831
Turbulent Boundary-Layer Effects on Base Pressure, Fred G. Hayos* 781

AERODYNAMICS—BOUNDARY LAYER

The Boundary Layer in Simple Shear Flow Past a Flat Plate, M. B. Glauert* 848
Author's Reply, Ting Yi Li* 849
Boundary-Layer Measurements at Supersonic Nozzle Throats, Merwin Sibulkin 249
Boundary-Layer Stabilization by Distributed Damping, Max O. Kramer* 459
Discussion of the Influence of Confining Surfaces Upon the Boundary Layer in a Channel, Ralph Burton* 149
Displacement Thickness of the Unsteady Boundary Layer, Franklin K. Moore and Simon Ostrach* 77
An Experimental Investigation of Leading-Edge Shock-Wave - Boundary-Layer Interaction at Mach 5.8, James M. Kendall, Jr. 47
Experimental Pitot-Pressure Profiles of Supersonic Laminar Boundary Layer in a Weak Adverse Pressure Gradient, Eugene A. Racicot* 779
Experiments on Boundary-Layer Transition at Supersonic Speeds, E. R. van Driest and J. Christopher Boison 885
Fixing Boundary-Layer Transition on Supersonic Wind-Tunnel Models, Marvin Luther 579
The Interaction of a Reflected Shock Wave With the Boundary Layer in a Shock Tube, Herman Mark* 304
Laminar Boundary Layer on a Spinning Cone at Small Angles of Attack in a Supersonic Flow, R. Sedney 430
Laminar Boundary Layer with Nonadiabatic Rotational Free Stream, Franklin D. Hains* 623
Note on the Boundary-Layer Instability on a Flat Plate Stopped Suddenly, Francis R. Hama* 471
On the Distribution of Intermittency in the Transition Region of a Boundary Layer, Roddam Narasimha* 711
On Magnus Effects Caused by the Boundary-Layer Displacement Thickness on Bodies of Revolution at Small Angles of Attack, John C. Martin 421
Prediction of Turbulent Boundary-Layer Separation, James M. Robertson* 631
The Pressure Rise at Shock-Induced Turbulent Boundary-Layer Separation in Three-Dimensional Supersonic Flow, Raymond J. Stalker* 547
Remarks on the Equilibrium Turbulent Boundary Layer, Donald Coles 495
Second Approximation to the Laminar Boundary-Layer Flow Over a Flat Plate, Isao Imai* 155
The Shear Flow Along a Flat Plate With Uniform Suction, Takeo Sakurai* 79
Some New Conceptions of the Mechanism of Stall in Turbulent Boundary Layers, Stephen J. Kline* 470
Subsonic Boundary-Layer Transition Caused by Single Roughness Elements, J. Leith Potter* 158
Turbulent Boundary-Layer Effects on Base Pressure, Fred G. Hayos* 781

AERODYNAMICS—BOUNDARY-LAYER HEAT EFFECTS

The Analytic Study of Laminar Boundary-Layer Stability in Free Convection, J. E. Plapp* 318
An Approximate Solution of the Laminar Heat Transfer Along a Heated Flat Plate With an Arbitrary Distribution of Surface Temperature, G. Lowe* 920
Boundary-Layer Transition on a 10° Cone at Mach Number 2.81 as Affected by Extreme Cooling, E. R. van Driest and W. D. McCauley* 780
Dissociation Effects in Hypersonic Viscous Flows, Y. H. Kuo 345
The Effect of an Arbitrary Distribution of Surface Temperatures on Heat Transfer in the Compressible Laminar Boundary Layer, Craig M. Schmidt and Arnold J. Hanawalt* 73
Effect of Externally Generated Vorticity on Laminar Heat Transfer, Richard M. Mark* 923
Experimental Study of the Stagnation Temperature in a Free Molecular Flow, F. M. Devienne 403
Free Molecular Flow Forces and Heat Transfer for an Infinite Circular Cylinder at Angle of Attack, L. Talbot* 458
Heat Transfer in a Laminar Boundary Layer From a Surface Having a Temperature Distribution, B. N. Pridmore Brown* 912
The Heated Vertical Plate at High Prandtl Number, K. Stewartson and L. T. Jones* 379
Investigation of Local Laminar Heat Transfer on a Hemisphere for Supersonic Mach Numbers at Low Rates of Heat Flux, I. Korobkin and K. H. Gruenewald 188
Leading-Edge Temperature of a Flat Plate Subjected to Aerodynamic Heating, A. E. Bryson, Bernard Budiansky, and George F. Carrier* 311
Nonsteady Surface Temperature Effects on Forced Convection Heat Transfer, E. M. Sparrow and J. L. Gregg* ... 776
Normal Conduction Effects on Heat-Transfer Data During Transient Heating of Thin-Skin Models, Morton Cooper and Edward E. Mayo* 461
Note on the Mach Number Effect Upon the Skin Friction of Rough Surfaces, Hans W. Liepmann and Frank E. Goddard, Jr.* 784
Simplified Equations for Calculating Local and Total Heat Flux to Nonisothermal Surfaces, E. R. G. Eckert, J. P. Hartnett, and Roland Birkebak* 549
Summary of Low-Prandtl-Number Heat-Transfer Results for Forced Convection on a Flat Plate, E. M. Sparrow and J. L. Gregg* 852

AERODYNAMICS—INTERFERENCE

Diffraction of Disturbances Around a Convex Right Corner With Applications in Acoustics and Wing-Body Interference, Lu Ting 821
Favorable Interference in Lifting Systems in Supersonic Flow, Antonio Ferri, Joseph H. Clarke, and Lu Ting ... 791
Optimum Thickness and Lift Distribution for a Fuselage in the Presence of a Prescribed Wing System, M. E. Graham 142

AERODYNAMICS—INTERNAL FLOW

Choking Flow in Curved Ducts, F. F. Ehrich* 319
Damping Due to Internal Flow, A. W. Gilmore and T. L. Keller* 317
The Effect of Molecular Vibration on Recovery Temperature in Plane Couette Flow, Hsun-Tiao Yang* 911
An Exact Solution of the Navier-Stokes Equations, W. Chester* 853
Experimental and Analytical Investigation of Secondary Flows in Ducts, Howard Z. Herzig and Arthur G. Hansen 217
Further Comments on "Supersonic Diffuser Instability," Charles L. Dailey* 70
Note on Turbulent Friction Factor of Flow Through Narrow Annuli, L. N. Tao* 915

On the Couette Flow of a Compressible, Viscous, Heat-Conducting, Perfect Gas, A. J. A. Morgan* 315
On the Evaluation of Two Functions Occurring in Maslen and Moore's Theory of Strong Transverse Waves in a Circular Cylinder, Henry E. Fettis* 64
On the Mach Number at the Diffuser Throat of an Ejector According to the Hydraulic Analogy, Syōgo Matsunaga* 918
On Turbulent Flow and Eddy Heat Transfer Diffusivity in a Pipe, Raul R. Hunziker and José S. Florio* 782
Reply to "Further Comments on 'Supersonic Diffuser Instability,'" Robert L. Trimpi* 845
Reply, C. L. Dailey* 846
The Secondary Flow Behind a Cascade, S. Soundranayagam* 706
Sidewall Influence on Oblique-Shock Pressure, R. H. Page* 777
Some New Conceptions of the Mechanism of Stall in Turbulent Boundary Layers, Stephen J. Kline* 470
Wide-Angle Diffusers of High Performance and Diffuser Flow Mechanisms, S. J. Kline, C. A. Moore, and D. L. Cochran* 469

AERODYNAMICS—NOZZLES AND JETS

The Aerodynamic Variable Nozzle, A. I. Martin 357
Boundary-Layer Measurements at Supersonic Nozzle Throats, Merwin Sibulkin 249
Experiments on Interaction Between a Traveling Shock Wave and a Turbulent Jet, Darshan S. Dosanjh 838
Location of Mach Discs and Diamonds in Supersonic Air Jets, Donald E. Wilcox, Alexander Weir, Jr., J. A. Nicholls, and Roger Dunlap* 150
On Ménard Inserts in Supersonic Nozzles, J. L. Amick, S. A. Harrington, and H. P. Liepman* 707

AERODYNAMICS—TURBINES AND COMPRESSORS

Circumferential Inlet Distortions in Axial Flow Turbomachinery, Fredric Ehrich 413
Note on the Change from Multi-Cell to Single-Cell Rotating Stalls, F. Cheers* 392
Rotating Stall in Axial Flow Compressors, Jean Fabri and Raymond Siestrunck 805
Some Aerodynamic Problems of Aircraft Engines, William Rede Hawthorne 713

AERODYNAMICS—VORTICES

Effect of Air Temperature on Vortex Shedding Frequency of Cylinders, William D. Clifford* 852
Physical Mechanism of Vortex-Ring Cascade, Norbert J. Dabrowski* 708
"Vortex Interference Effects . . .," M. Z. v. Krzywoblocki* 778
Vortex Interference Effects on the Aerodynamics of Slender Airplanes and Missiles, Alvin H. Sacks 393
Vortex-Ring Cascade and a Conjectured Model of Transition to Turbulence, C. S. Hsu* 313
Vortex-Ring Cascade and Turbulence Transition, Vivian O'Brien* 629

AERODYNAMICS—WINGS AND AIRFOILS

Drag Due to Lift for Delta Wings at Supersonic Speeds, Seymour Lampert* 919
Effects of Leading-Edge Separation on Thin Wings in Two-Dimensional Incompressible Flow, L. F. Crabtree 597
Erratum—"Inversion of the Prandtl-Meyer Relation for Specific Heat Ratios of 5/3 and 5/4," Ronald F. Probstein* 632
Experiment on the Variation of Airfoil Properties With Reynolds Number, A. F. Charwat* 386
An Introduction to Second-Order Wing Theory, D. C. M. Leslie 99
Inversion of the Prandtl-Meyer Relation for Specific-Heat Ratios of 5/3 and 5/4, Ronald F. Probstein* 316
Limitations of Circulation Lift, Heinrich B. Helmbold* 237
Normal-Force Characteristics of Delta Wings at Supersonic Speeds, Seymour Lampert 667
On the Use of Interfering Flow Fields for the Reduction of Drag at Supersonic Speeds, Antonio Ferri and Joseph H. Clarke 1
Rule of Thumb Equation for Predicting Lifting-Surface-Theory Values of Lift, John DeYoung* 629
Sears Function in Unsteady Flows, Hsuan Yeh* 546
Supersonic Flow Past an Oscillating Cascade With Supersonic Leading-Edge Locus, Frank Lane* 65
Theory of the Finite-Span Blowing Wing, H. B. Helmbold 339
The Transient Downwash Resulting From the Encounter of an Airfoil With a Moving Gust Field, Norman P. Hobbs 731
Unsteady Flow Around Thin Wings at High Mach Numbers, Marten T. Landahl 33
The Warping of Triangular Wings for Minimum Drag at Supersonic Speeds, Doris Cohen* 67

AEROELASTICITY

An Approximate Method Applied to the Solution of the Problem of Vibrating Rectangular Plates, Milomir M. Stanišić* 159
The Effect of Amplitude on the Torsional Vibrations of Solid Wings Subjected to Aerodynamic Heating, Josef Singer 620
The Effect of Flexibility on the Drag Polar of an Aircraft, W. P. Rodden, T. E. Surber, and H. C. Vetter* 456
Errata—"Subsonic Oscillatory Control Surface Coefficients Computed by the Method of Reissner and Haskind," Henry E. Fettis* 552
Errata—"Vibration of Clamped Parallelogrammic Isotropic Flat Plates," M. Hasegawa* 552
An Experimental Study of the Response of Simple Panels to Intense Acoustic Loading, Leslie W. Lassiter, Robert W. Hess, and Harvey H. Hubbard 19
Extension of "An Aeroelastic Parameter for Estimation of the Effects of Flexibility on the Lateral Stability and Control of Aircraft," William P. Rodden* 624
Flutter of Rectangular Simply Supported Panels at High Supersonic Speeds, John M. Hedgepeth 563
Influence of Thermal Stresses on the Aeroelastic Stability of Supersonic Wings, M. A. Biot 418
An Investigation of Effects of Certain Types of Structural Nonlinearities on Wing and Control Surface Flutter, Donald S. Woolston, Harry L. Runyan, and Robert E. Andrews 57
Mathematical Analysis and Analog Simulation of Atmospheric Turbulence Gust Velocities, Julius S. Bendat* 69
Natural Frequencies of Rectangular Plates With Edges Elastically Restrained Against Rotation, C. V. Joga Rao and C. Lakshmi Kantham* 855
A Note on Steady-State Aeroelasticity, Alan H. Wickens* 383
On Aeroelastic Solutions, William J. Gaugh and Joseph K. Slap* 76
On the Flutter of Infinitely Long Panels on Many Supports, Robert W. Leonard and John M. Hedgepeth* 381
On the Flutter of Swept Wings, Peter F. Jordan 203
On the Prediction of Gust and Buffet Response of Wings and Airfoils, Albert S. Richardson, Jr.* 385
On a Reciprocity Condition for Supersonic Flutter, John W. Miles* 920
On the Simulation of Random Excitations for Airplane Response Investigations on Analog Computers, Bernard Mazelsky and Harry B. Amey, Jr. 633
On a Third Mode of Longitudinal Control-Fixed Oscillation, Bernard Etkin* 71

On the Vibration of Thin Cylindrical Shells Under Internal Pressure, Y. C. Fung, E. E. Sechler, and A. Kaplan 650
A Series-Expansion Method for Computing Random Gust Responses, Kenneth A. Foss* 850
Some General Properties of the Dynamic Amplification Spectra, Y. C. Fung* 547
Subsonic Oscillatory Control Surface Coefficients Computed by the Method of Reissner and Haskind, Henry E. Fettis* 378
Supersonic Flutter of a Cylindrical Shell, John W. Miles 107
A Technique for Computing Natural Frequencies of Trapezoidal Vibrators, Nobuo Inoue* 239
The Transient Downwash Resulting From the Encounter of an Airfoil With a Moving Gust Field, Norman P. Hobbs 731
Vibration of Clamped Parallelogrammic Isotropic Flat Plates, M. Hasegawa* 145

AERONAUTICAL DEVELOPMENT

Some Comments on Current Aviation Topics (Twentieth Wright Brothers Lecture), Sir Arnold Hall 161

CONTROL AND STABILITY (including Automatic Control)

Automatic Control With Artificial Inertia, G. M. Andrew* 306
Criteria for the Generalized Dynamic Stability of a Rolling Symmetric Missile, Charles H. Murphy, Jr.* 773
Cross-Coupling Dynamics and the Problems of Automatic Control in Rapid Rolls, J. D. Welch and R. E. Wilson 741
Extension of "An Aeroelastic Parameter for Estimation of the Effects of Flexibility on the Lateral Stability and Control of Aircraft," William P. Rodden* 624
Induced Rolling Moments at Supersonic Speeds, George S. Campbell* 463
On the Frequency Spectrum Generated by a Maneuvering Aircraft, A. P. Brogle 487
The Prediction of Nonlinear Pitching and Yawing Motion of Symmetric Missiles, Charles H. Murphy, Jr. 473
The Response of a Bisymmetric Aircraft to Small Combined Pitch, Yaw, and Roll Control Actions, Robert A. Davis 905
A Theoretical and Experimental Study of Airplane Dynamics in Large-Disturbance Maneuvers, Donald W. Rhoads and John M. Schuler 507

FLIGHT PROPULSION

Characteristics and Sound Speed in Nonisentropic Gas Flows With Nonequilibrium Thermodynamic States, E. L. Resler, Jr. 785
Flow Disturbances Induced Near a Slightly Wavy Contact Surface, or Flame Front, Traversed by a Shock Wave, G. H. Markstein* 238
Some Aerodynamic Problems of Aircraft Engines, William Rede Hawthorne 713

HYDRAULIC EQUIPMENT

Buckling Loads of Pin-Ended Fluid Columns, Eryk Kosko* 309

INSTRUMENTS

Dynamic Considerations Relating to the Behavior of Inertial Space-Stabilized Platforms, Edmund Gorczycki 130
Geometric Stabilization, A. Lange* 465
A Short Static-Pressure Probe Independent of Mach Number, Erik L. Mollo-Christensen, Marten T. Landahl, and John R. Martuccelli* 625

MATERIALS

Stress Concentration in Plexiglas as a Function of Loading Rate, Leo V. Kline* 551

MATHEMATICS AND MECHANICS

On Complex Roots of an *n*th Degree Equation, C. A. M. van der Linden* 384
On Some Concepts of Nonlinear Oscillation Theory, K. Klotter* 78
Real Part of the Square Root of a Complex Number, E. V. Laitone* 391

MISSILE LAUNCHING

A Note on Missile Launching, Telford W. Oswald* 74

PERFORMANCE

Comments on "Analysis of a Rolling Pull-Out Maneuver," W. J. G. Pinsker* 68
An Extension of the Theory of the Optimum Burning Program for the Level Flight of a Rocket-Powered Aircraft, Angelo Miele 874
On a Minimum-Time Flight Path of a Jet Aircraft, John Carstoiu* 704

ROTATING WING AIRCRAFT

A Comparison of the Calculated and Observed Flutter Characteristics of a Helicopter Rotor Blade, Leonard Goland and Abraham A. Perlmutter 281
Flutter of a Helicopter Rotor Rotating in Its Own Wake, R. Timman and A. I. van de Vooren 694
A Two-Dimensional Approximation to the Unsteady Aerodynamics of Rotary Wings, Robert G. Loewy 81

STRUCTURES AND STRESS ANALYSIS

The Balance Method Applied to Swept-Wing Stress Analysis, Luigi Broglio 363
Bending and Buckling of Clamped Sandwich Plates, G. A. Thurston 407
Bending Strength of Tubing in the Plastic Range, Clifford S. Ades 605
Buckling of Thin-Walled Circular Cylinders Under Axial Compression and Internal Pressure, Y. C. Fung and E. E. Sechler 351
The Buckling of Triangular or Skew Plates, Victor I. Weingarten* 384
Buckling Under External Pressure of Cylindrical Shells Evenly Stiffened by Rings Only, P. P. Bijlaard 437
A Comment on "Bending and Buckling of Clamped Sandwich Plates," Paul Seide* 782
Deflection of a Circular Section Cantilever Beam With All Fibers of Root Section at Elastic Limit Stress, B. Saelman* 234
Donnell's Equation for Thin Shells, Herbert Becker* 79
An Extension of Donnell's Equation for a Circular Cylindrical Shell, Tsu-Tao Loo* 390
Further Comments on the Buckling of Triangular Plates, Hugh L. Cox* 775
Further Remarks on the Collapse Pressures of Uniformly Loaded Spherical Shells, Bertram Klein* 309
Limitations of the Finite Difference Method of Structural Analysis, Bertram Klein* 774
Lower Buckling Stress of Circular Cylindrical Shells Subjected to Torsion, Yoshimaru Yoshimura and Jun'etsu Niisawa 211
Nonlinear Deflections of Shallow Spherical Shells, Edward L. Reiss, Herbert J. Greenberg, and Herbert B. Keller 533

On Choosing Stress Functions in Rectangular Coordinates, F. W. Niedenfuhr* ... 460
On the Minimum Weight Design Problem for Cylindrical Sandwich Shells, Walter F. Freiberger* ... 847
On the Variational Theorem for Creep, T. H. H. Pian* ... 846
The Plastic Bending of an Eccentrically Loaded Column, William E. Boyce ... 332
Plastic Buckling of Simply Supported Plates Subjected to Combined Shear and Bending or Eccentric Compression in Their Plane, P. P. Bijlaard ... 291
Plastic Stability Theory of Thin Shells, George Gerard ... 269
Plastic Torsional Buckling Strength of Cylinders Including the Effects of Imperfections, Lawrence H. N. Lee and Clifford S. Ades ... 241
Postbuckling Behavior of Circular Cylindrical Shells Under Hydrostatic Pressure, Joseph Kempner, K. A. V. Pandalai, Sharad A. Patel, and Jacques Crouzet-Pascal ... 253
The Significance of Zero Shear Stress in the Pure Bending of a Wide Curved Bar, Bernard W. Shaffer and Raymond N. House, Jr.* ... 307
A Simple Method of Matric Structural Analysis, Bertram Klein ... 39
A Simple Method of Matric Structural Analysis: Part II—Effects of Taper and Consideration of Curvature, Bertram Klein ... 813
The Stability of Thin-Walled Unstiffened Circular Cylinders Under Axial Compression Including the Effects of Internal Pressure, Leonard A. Harris, Herbert S. Suer, William T. Skene, and Roland J. Benjamin ... 587
Tables and Curves for Deformations and Stresses in Circular Cylindrical Shells Under Localized Loadings, Joseph Kempner, James Sheng, and Frederick V. Pohle 119
Theories of Strength for Combined Stresses and Nonisotropic Materials, Joseph Marin ... 265
Total Creep Under Varying Loads, William Prager* ... 153
Use of Stiffened Cylinders vs. Use of Unstiffened Cylinders, Bertram Klein* ... 703

STRUCTURES AND STRESS ANALYSIS—THERMAL STRESSES

An Analysis of the Effect of Thermal Contact Resistance in a Sheet-Stringer Structure, Antony D. Barber, Jerome H. Weiner, and Bruno A. Boley* ... 232
The Calculation of Thermoelastic Beam Deflections by the Principle of Virtual Work, Bruno A. Boley ... 139
Comments on "Investigation of the Temperature Distribution and Thermal Stresses in a Hypersonic Wing Structure," Shih-Yuan Chen* ... 544
The Effect of Amplitude on the Torsional Vibrations of Solid Wings Subjected to Aerodynamic Heating, Josef Singer ... 620
Effect of the Change in Thermal Stresses Due to Large Deflections on the Torsional Rigidity of Wings, Josef Singer and N. J. Hoff* ... 310
Effect of Thermal Resistance of Joints Upon Thermal Stresses, B. E. Gatewood* ... 152
